PROFILE

A results-oriented Computer Science graduate specializing in AI & Data Science, with a proven ability to bridge the gap between technical execution and business strategy. Experienced in translating complex requirements into scalable backend architectures and conducting strategic data governance gap analyses in high-stakes public sector environments.

EXPERIENCE

COOP Trainee, General Entertainment Authority (GEA) - Data Governance & Compliance: Formulated and executed a comprehensive Gap Analysis to align GEA's data assets with the SDAIA National Data Index (NDI) standards; identified critical process gaps and drafted compliance roadmaps for the Data Management Office (DMO). - Business-IT Translation & Architecture: Translated complex business requirements into technical blueprints by designing conceptual data models and Entity-Relationship Diagrams (ERDs) for the critical <i>Investor</i> and <i>License</i> portal modules. - Scalable Backend Design: Engineered high-performing, service-oriented services using C# and .NET (SOA); containerized deployment workflows utilizing Docker to achieve 100% environment consistency across development and production pipelines. - Database Optimization: Analyzed and optimized relational database queries within MS SQL Server, reducing query execution times and stabilizing core functionalities for GEA's high-traffic public licensing portal.	01/2026 – Present Riyadh, Saudi Arabia
Computer Science Intern, Saudi Executive Trading L.L.C - Data Analysis & Visualization: Preprocessed and analyzed high-volume IoT-generated datasets; developed interactive data visualizations and business dashboards to extract actionable performance trends. - IoT & Technical Problem Solving: Evaluated sensor-to-cloud protocols and resolved latency issues during hardware-software integration, improving overall system connection reliability.	06/2023 – 09/2023 Riyadh, Saudi Arabia

EDUCATION

Prince Sultan University BSc in Computer Science (AI & Data Science Track) GPA: 3.6/4.0	2022 – 2026 Riyadh, Saudi Arabia
--	-------------------------------------

TOOLS & RELEVANT COMPETENCIES

Technical Skills & Competencies - Consulting & Business Analysis: Business-IT Translation, Requirements Elicitation, Gap Analysis, Data Governance, SDAIA NDI Standards, Stakeholder Management, ERD & Data Modeling. - Data & AI Stack: Python, MySQL, MS SQL Server, MongoDB, Power BI, Data Analytics, Systems Integration. - Software & Cloud Engineering: C#, .NET (SOA), Docker, Java, JavaScript, Express, Node.js, HTML/CSS, Linux, Jira. - Core Competencies: Quantitative Methods, Financial Analysis, Strategic Mindset, Adaptability, Structured Problem Solving.	Professional Soft Skills - Structured Problem Solving & Frameworks: Ability to break down complex, ambiguous business problems into logical issues to identify root causes. - Executive & Technical Communication: Skilled at translating complex data science and AI concepts into clear, non-technical insights for senior leadership and business stakeholders. - Managing Ambiguity & Adaptability: Proven capacity to quickly pivot operational focus based on evolving project requirements. - Cross-Functional Collaboration: Experienced in working seamlessly across business units and technical engineering teams to drive alignment on project deliverables. - Client-Centric Strategic Mindset: Focused on aligning technical and data-driven solutions with broader organizational strategies and national compliance standards. - Continuous Learning & Curiosity: Rapidly upskilling in high-demand technologies, methodologies, and frameworks to add immediate project value.
